

Memo 1

Sea Memory Collection is action integrated in its ambient and geo-temporary components. Mainly plastic and glass bottles, wood, ropes are recycled into Action-art configurations to enhance human awareness of the ecological problems. Mr. Lihidheb Mohsen aims to have the Sea Memory Museum help in the world wide spread of cleaning up the environment and giving a Renaissance persona to respecting Nature.

Past Accomplishments:

1. Mr. Lihidheb has received a Guinness World Record for largest collection of different objects
2. Documentary film "Sea Memory" Featured on TV, Radio, newspapers from around the world
3. Created the Sea Memory Museum to display his artwork
4. Has integrated his works with the Museum with the Educational Department in Tunisia and has given Environmental Lectures
5. Received letter of appreciation from Greenpeace

Present Activities:

1. Cleaning the beaches off of the Mediterranean coast
2. Creating Action art for the Sea Memory Museum
3. Giving Environmental Lectures

Future Activities:

1. Spread Environmental approach abroad
2. Articulate the human intellect about Nature Worldwide

Sea Memory is the result of an individual relation with the sea during 12 years. With neither cultural nor ideological background and without any pre-established scale of values, I went back to the sea at the age of 40, like a new born child, armed only with a real predisposition to cope and behave fairly with things, beings and happenings. So, with a free mind, I began to collect all what comes from the Mediterranean, on the waves of providence and at sunrise, as presents from the sea and from God. Action began with a movement which gave Ideas and then came the role of the Verb to carry, as a pregnant letter the message of life.
