

# Ring Sizing Instructions for Order of the Engineer

Rings are for the 5<sup>th</sup> finger (pinkie finger) on your working hand.

These rings have a wider band, and therefore require that you order a half-size up from your initial measurement for a more comfortable fit.

## How to Measure Your Finger:

Your ring should fit your finger comfortably and snug enough so that it will not fall off, but loose enough to slide over your knuckle with some resistance.

You can [print the ring measurement tool here](#) to determine your size by following these instructions:

1. Print (do NOT scale to fit page) and cut out the ring sizer linked above. Ensure that scaling of the printed sizer is correct by verifying the 3.5-inch length.
2. Cut a small slit along line A where you will read the ring size.
3. Place ring sizer comfortably around your pinkie finger of your working hand by slipping the pointed end of the paper through the slit, numbers facing out.
4. Secure the ring sizer by pulling the pointed end snugly around your finger. Be sure that it is not too tight or too loose.
5. Your approximate ring size should be the number that appears where it says "Read Size Here"
6. Go up a half-size for the most comfortable fit with this wider ring band.

## Finger size changes depending on the time of day and the weather. For best results:

- Measure your finger size at the end of the day and when your fingers are warm (fingers are smaller in the early morning and when cold).
- Measure your finger size 3 to 4 times to eliminate an erroneous reading.

## Temperature is Important:

Do not measure when your body temperature is either too cold or too hot. A cold finger shrinks while a warm finger expands causing an inaccurate reading. Only measure when fingers are at room temperature.

## When Two Sizes seem to Fit:

If you hesitate between two sizes, always go with the larger size.

## Big Knuckles Can Affect Your Size:

If your knuckle is a lot larger than the base of your finger, and you are using a virtual ruler, measure both the base of your finger and your knuckle and select a size in between the two.
